**FATHER'S
DAY**

Our CEO's Message

Dear HMC Residents, This month we officially welcome summer, celebrate graduations, observe Father's Day, and prepare for PCS season. Congratulations to all of our graduates. Whether you are graduating college or kindergarten, taking the next step in your educational career, and in life, is important and should be celebrated! We want to ease the burden and stress that often comes with moving, and one way we can do this is to ensure we are providing clear communication, answering questions, and walking you through the process. You are encouraged to reach out to your Resident Service Specialist once you have received orders so they can guide you through every step. On behalf of Hunt Military Communities, I wish all of our fathers and father -gures, a Happy Father's Day. Whether you are serving far away or close to home – or supporting a spouse who is active duty – your commitment to your country and families is admirable. We look forward to honoring you this month.

Semper Fidelis,
Brian Stann

President & Chief
Executive Officer Hunt Military Communities

Caring for Pets in Hot Weather

Hot Asphalt Test

During Warmer Seasons

- Never leave your pet in your car, even in the shade with the windows cracked or in a stuffy room.
- Use air conditioners to keep environment cool or fans to increase air circulation.

- Walks should be at dawn and dusk (before 8am and after 6pm). Limit walks during the middle of the day.
- Have ready access to cool, fresh water. Take a bottle of water with you when walking your pet. Leave an extra bowl of water in case one gets knocked over.

Heatstroke leads to

- Brain damage
- Kidney damage or failure
- Muscle damage
- Liver failure

What to do if you suspect your pet is overheated

- Spend no more than 5 minutes wetting down your pet all over with cool water (use hose, bucket, bath tub).
- Do not delay seeking treatment. Do not take a 'wait and see approach'. Contact MetroVet at 312-583-1921 to let us know you are on your way.
- Treatment at MetroVet will include IV fluids, plasma, oxygen and checking blood/urine tests to determine if organ damage has occurred.
