

Whether your family has braved several deployments or this is your first time, the experience can be intimidating and confusing. It is with unwavering support that we at Eagle Heights stand ready to assist our families touched by deployment or long term separation, and bring peace-of-mind to our deployed service members.

Around the Home

In addition to 24-hour maintenance services already provided to our residents, our professional and friendly staff will be providing a voucher for up to one hour of "honey-do" chores that can quickly build up, such as, hanging pictures, moving furniture, or taking out the trash. Participating families will also receive a free carpet cleaning during the deployment.

Lawn care

Our Brightview landscaping team is here year round to help with the yard maintenance that would usually be the responsibility of the resident; including mowing and maintaining your fenced in yard during a deployment or long term separation.

Community Events

Spending time with other families who understand the experience first-hand can be a great comfort, which is why we host at least one event per month to bring everyone together. We will also be happy to take a pre-deployment photo of your family to have as a special keepsake.

Our deployment resident support program is available to assist families of active duty service members during dependent-restricted/unaccompanied assignments or deployments lasting 90 days or longer. To participate provide a copy of military orders meeting this criteria.

Please visit these sites for additional preparation support and resources

Get rid of ANTS naturally...No, really!!

Did you know ants will enslave other ants, keeping them captive and making them do work for the colony? Ants are not cool! With ingredients I bet you have in your kitchen right now, you can evict these unwelcome house guests. Look in your kitchen for cayenne pepper, vinegar, lemon juice, or dish soap, any or all will do! Mix them with water in a clean empty spray bottle and spray around the ant infested areas. For more tips on how to naturally get rid of ants or other household pests go to www.organiclesson.com
